Other: None

ENCLOSURES: Annotated photograph of Radio Plant 619

ORR REQUIREMENT NO. RR/HTA/E/R19/56: Report changes since 1944 in Leningrad Radio Plant 619. Describe antenna structure on the roofs, radar trailers in the plant area, or any other indication of the type of electronic equipment produced in this plant.

REMARKS:

Radio Plant 619, located on Petrovskiy Island in NW Leningrad, has undergone expansion since 1944. Two new buildings, 70'x 200' and 70'x 160', have been constructed in the E section of the plant. (See accompanying photograph.)

The small scale of the photography precludes a description of antenna structure or any other indications of the type of electronic equipment produced at this plant. In an open area near the center of the plant are several stored vehicles which might possibly be small trailers or mobile units associated with electronic equipment.

Immediately west of Radio Plant 619 in a large open area is a 500' high mast. A transmitter building and a few small buildings are located near its base.
